

FortisBlue Mobile

Access FortisBlue documents from a tablet computer

With **FortisBlue Mobile**, users can access **FortisBlue** securely via mobile devices including the iPad® and Android-based tablets. **FortisBlue** users can move conveniently from a desktop computer to a tablet. It's efficient and accessible for those who travel to customer sites or work from home frequently. With **FortisBlue Mobile**, employees stay current while on-the-go.

With **FortisBlue Mobile** you can:

- Access **FortisBlue** securely via mobile devices
- Find documents on-the-fly or use searches already created for easy document retrieval
- Support a mobile workforce requiring information anytime, anywhere
- Improve collaboration for remote employees

An employee evaluation awaiting a manager's review

Bookmark FortisBlue

To install **FortisBlue Mobile**, the user bookmarks the **FortisBlue** home page on a mobile device. This installs an icon on the mobile device's home screen. Then the user logs on with their **FortisBlue** credentials.

Users can search any **FortisBlue** databases they have permission to view or access searches they have already created to retrieve archived **FortisBlue** documents. By taking full advantage of tablet features for easy navigation, a user can swipe across the search results grid and through multi-page documents. Tap the results grid once to open a document and double tap or use the zoom button to focus in on one part of a document that you want to view. Users can also view index fields.
